

# Electronic Dynamo Regulators

DR340    DR110  
DR310    DRM

## EXCLUSIVE FEATURES

- Continuously adjustable voltage and current limits
- Highest current rating & lowest heat dissipation of any electronic dynamo regulator
- Works with virtually any DC generator
- Works with field resistance down to 0.8 ohms.
- Factory Calibrated to match your dynamo
- Fully tested & burned-in at full load
- Fully Repairable

## APPLICATIONS

- Autos
- Motorcycles
- Trucks
- Tractors
- Boats

# Electronic Dynamo Regulators

## Description

The Clover Systems Dynamo Regulator is an all-electronic voltage and current regulator for DC generators used in pre-1970 motor vehicles. It can be used in vintage cars, motorcycles, trucks, tractors and boats.

Replace your old mechanical regulator with an all-electronic regulator that never requires cleaning or adjustment. Don't waste your money on used or aftermarket mechanical replacements. This control box will be trouble free for the life of your car.

## Benefits

- Never needs cleaning or adjustment
- Super-efficient cutout
- Trouble-free for the life of your vehicle
- DRM Module can be installed in the case of your original regulator for original appearance

## Features

- Regulates both voltage and current
- 6, 8, 12, 24 volts, 7 – 55 amps, positive or negative ground
- Works with most DC generators, including Auto-Lite, Bosch, Delco, Ford, Lucas, etc.
- Automotive Grade components rated to 300°F
- Heavy-Duty Aluminum and stainless steel construction
- Installation hardware and instructions included
- Fully tested & burned-in at full load
- Made in USA
- One year warranty
- 30-day money-back guarantee

# Electronic Dynamo Regulators

## Compatibility

Clover Systems Electronic Dynamo Regulators are compatible with most DC generators, including Autolite, Bosch, Delco, Ford, Lucas, and many others, including Ducellier, Eclipse, Harley-Davidson, Magneti-Marelli, Paris-Rhone, and Rotax. Vehicles include most pre-1970 cars, motorcycles, trucks, tractors, and boats.

- The DR340 and DR310 are designed to be exact replacements for Lucas RB340 and RB310 regulators used in many European autos.
- The D110 is designed to replace many Delco, Autolite, Bosch, and Ford regulators.
- The DRM Module can be [Installed inside your original regulator case](#), retaining 100% original appearance.

A complete list of compatible models is too lengthy, so please contact us if you have any questions. The regulator can be configured to match your generator, including polarity, voltage, and current limit.

**Electronic Dynamo Regulator is available in four configurations:**

### DR340

- Exact replacement for Lucas RB340
- Accommodates Lucas cover

### DR310

- Exact replacement for Lucas RB 310.
- screw terminals or push-on connectors
- Accommodates Lucas cover

### DR110

- Exact replacement for many Delco Bosch, and Autolite regulators.
- Accommodates Delco, Autolite, Bosch, and Ford cover

### Dynamo Regulator Module

- Replacement or substitute for many regulators
- Suitable for cars, trucks, tractors, motorcycles, and boats.
