CALIFORNIA #10887

QUAKEAWAKE®

TESTED AT CALIFORNIA'S FINEST EARTHQUAKE LABS

EARLY WARNING EARTHQUAKE ALARM & RESPONSE SYSTEM

INCLUDES: FAMILY ACTION SURVIVAL GUIDE

MADE IN THE USA

GIVE YOUR FAMILY
MORE TIME
TO RESPOND
TO A MAJOR EARTHQUAKE!

CONTENTS:

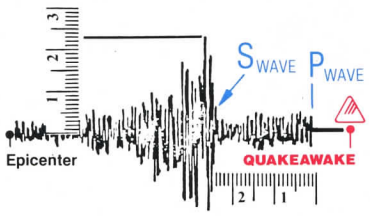

- California QUAKEAWAKE Earthquake Alarm.
- Official Family Action Survival Guide (English/Spanish).
- Emergency Supply List (English/Spanish).
- Easy Installation Instructions (English/Spanish).
- Rapid-Mount Materials.

A NEW CONCEPT IN EARTHQUAKE PROTECTION

CALIFORNIA QUAKEAWAKE®

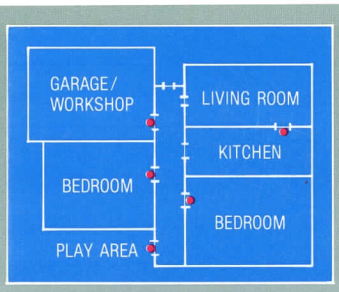

QUAKEAWAKE is a 2 Part System that combines an Earthquake Alarm with a Family Action Survival Guide.

FEATURES:

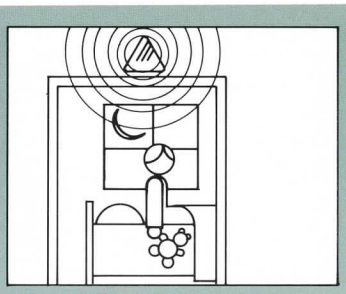

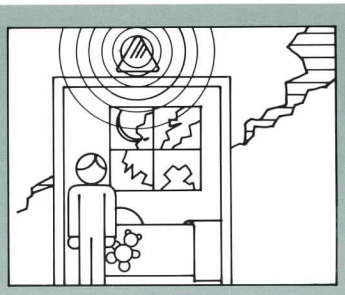

- Can alert you **before** the main force of a major earthquake reaches your area.*
- Up to 30 seconds early warning.**
- High decibel, distinctive pulsing, audible alarm.
- Variable sensitivity adjustment.
- Alarm automatically resets.
- Easy to install instructions included.
- Simple mounting adjustment for all wall textures.
- Battery test switch.

Great for home, office, school, garage, workshop & factories

QUAKEAWAKE Locations •

ALERTS YOU AND YOUR FAMILY INSTANTLY!

BE PREPARED

A major earthquake is inevitable for California, yet all earthquakes are potentially life threatening. A large percentage of earthquakes happen during the sleeping hours. Being prepared is the best chance for survival. The QUAKEAWAKE System prepares you!

* WHY CALIFORNIA QUAKEAWAKE WORKS

Earthquakes give an early warning by causing two separate and distinct seismic shock waves that pass through the earth's surface. The first is the "P" wave, a sound wave that moves very fast and is much **less powerful** than the second, slower moving, very **destructive**, "S" wave.

California QUAKEAWAKE is designed to react to "P" waves and give early warning.

** HOW MUCH EARLY WARNING?

Time varies with distance from the epicenter and soil conditions. The further you are, the more time you have. The "P" wave moves at about twice the speed of the "S" wave. For example, 60 miles from the epicenter, California QUAKEAWAKE can alert you while the S wave is still 30 miles away, giving you **more time** to respond!
